AN UNSAFE DISTANCE

*An examination of relations between
Governments and Farmers*

AN UNSAFE DISTANCE

This booklet reviews farming-government relationships in historical context, with particular reference to the UK but also drawing on international case study material. It argues that these relationships reached an all-time low during the past decade. The urgent issue of climate change and its inter-relationships with farming offers both impetus and wide reasons for striving to improve farmer-government relations. The paper concludes with pointers on how this might be achieved.
